Turn-key yacht solutions
A pleasant feeling!

Some clients are interested in composite materials besides our aluminium ventilation grills. FlowGrill next to researched composite technologies focussed on existing ventilation Grills along with special designs. After realizing some special projects with composite materials, FlowGrill continued with the composite technique and the results are impressive.

FlowGrill has proven to provide excellent service and quality and wants to continue this reputation with new innovative products as well.

THE NEW LOUVER SOLUTION IN COMPOSITE AND ALUMINIUM EXTRUSION

A revolutionary system in which flexibility, durability and solidity take priority. The best quality without compromises. Want to find out more? Please get in touch.

SPECIALIZED COMPOSITE TECHNOLOGIES

Composites play a major part for ventilation grills largely due to the versatility and impressive properties of these materials. The initial cost of the composite products is, depending on the chosen raw materials, more expensive but, the savings over the lifespan of the product tip the balance in favour of composites.

FlowGrill can supply a wide range of top end composite equipment. To find out more about the wide scope of marine specialized products please get in touch.

FlowGrill has proven to provide excellent service and quality and wants to continue this reputation with new innovative products as well.
